

Motorhome Habitation Damp Report

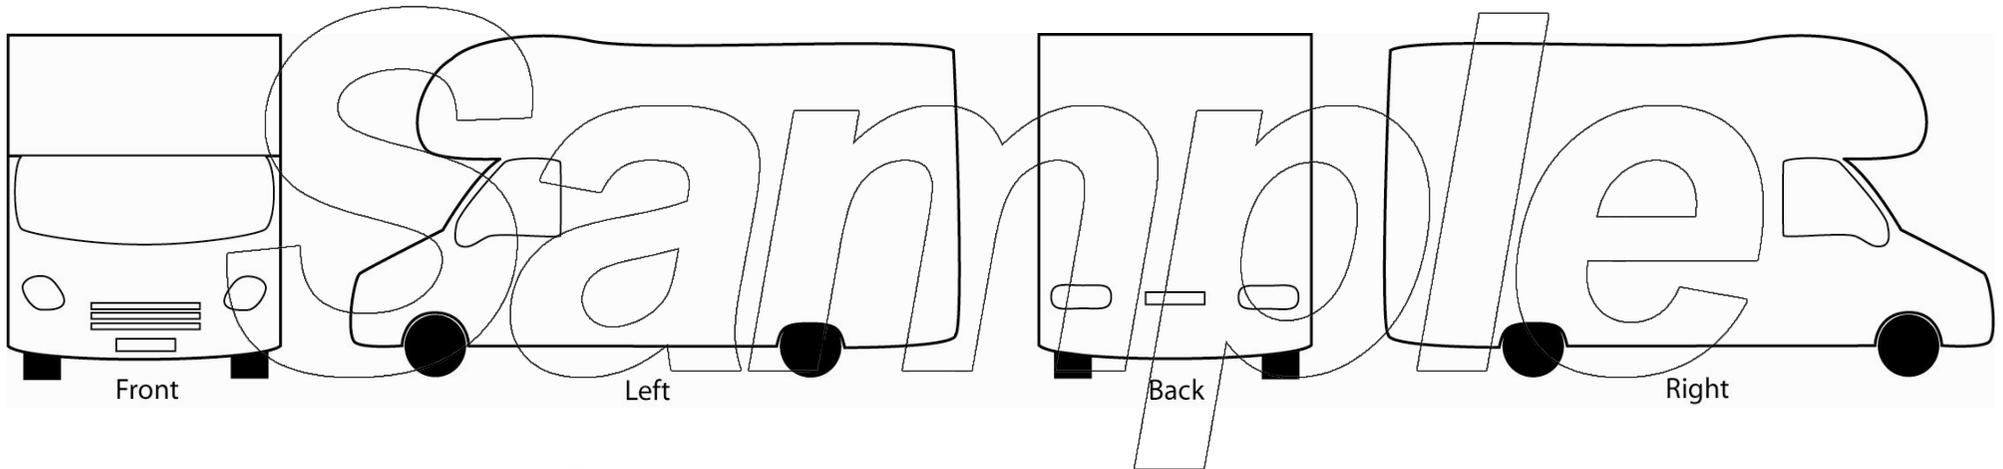

Workshop name & address:

Customer:

Make/model:

Registration No:

Checks must be carried out in accordance with the latest AWS Motorhome Standard Working Procedures

GUIDANCE NOTES

Readings between 0 - 15% - no cause for concern.

Readings between 15 - 20% - require further investigation. Compare with the caravan average reading. Consider asking to recheck the area in three months.

Readings greater than 20% - will identify areas needing remedial work. There may be early signs of water ingress or evidence of moisture. Again it may be worth considering a recheck after three months. When readings go above 30% then structural damage may be occurring and deterioration is inevitable.
